Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (17 CFR §230.405) or Rule 12b-2 of the Securities Exchange Act of 1934 (17 CFR §240.12b-2).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Item 2.02. Results of Operations and Financial Condition.

On May 2, 2018, Amarin Corporation plc issued a press release announcing its financial results for the three months ended March 31, 2018 (the "Press Release"). A copy of the Press Release is furnished herewith as Exhibit 99.1.

The information in this report furnished pursuant to Item 2.02 shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of that section. It may only be incorporated by reference in another filing under the Exchange Act or the Securities Act of 1933, as amended, if such subsequent filing specifically references the information furnished pursuant to Item 2.02 of this report.

Item 9.01. Financial Statements and Exhibits.

Amarin Reports First Quarter 2018 Financial Results and Provides Update on Operations

REDUCE-IT Study On-Track for Reporting Top-Line Results by the End of Q3 2018

Management to Host Conference Call at 7:30 a.m. ET Today

BEDMINSTER, N.J., and DUBLIN, Ireland, May 2, 2018 -- Amarin Corporation plc (NASDAQ:AMRN), a biopharmaceutical company focused on the commercialization and development of therapeutics to improve cardiovascular health, today announced financial results for the three months ended March 31, 2018, and provided an update on company operations.

Key Amarin achievements through March 31, 2018 include:

- **R&D progress:** The REDUCE-IT cardiovascular outcomes study, designed to provide data to support a significantly expanded market opportunity for Vascepa® (icosapent ethyl), is estimated to have reached the 100% mark for onset of the 1,612 target primary major adverse cardiovascular events (MACE) specified in the study design. Amarin anticipates that MACE from the study will be adjudicated through Q2 2018, consistent with the company's objective of reporting top-line results from this important study before the end of Q3 2018.
- **U.S. revenue growth:** Recognized \$43.8 million in net product revenue from Vascepa sales in Q1 2018 compared to \$34.3 million in Q1 2017, an increase of 27%.
- **U.S. prescription growth:** Increased normalized prescriptions for Vascepa by 25% and 27% compared to Q1 2017 based on data from Symphony Health Solutions and IQVIA, respectively.
- **International development:** Announced the first international approval for Vascepa with the regulatory approval of Vascepa in Lebanon. The clinical trial of Vascepa for approval in China is in process.
- **Cash balance:** As of March 31, 2018, Amarin had a cash balance of \$129.0 million, which includes approximately \$70.0 million in net cash proceeds from the equity offering announced in February 2018, compared to \$73.6 million at December 31, 2017.

"There is tremendous energy and excitement within Amarin currently as we approach the results of the REDUCE-IT study and prepare for targeted future growth," stated John F. Thero, president and chief executive officer. "The unmet medical need remains large for cost-effective therapies that lower cardiovascular risk beyond the risk reduction achieved with standard of care statin therapy alone. We are pleased that increasing numbers of physicians are prescribing Vascepa to help their patients and we are confident that the results from the REDUCE-IT study will lead to better informed decisions regarding patient care."

REDUCE-IT Cardiovascular Outcomes Study

REDUCE-IT is designed to determine if intervention with 4 grams/day of prescription pure EPA Vascepa will lower rates of major adverse cardiovascular events in statin-treated patients with persistent hypertriglyceridemia and other cardiovascular risk factors. Motivated by the vision of Amarin and its scientific collaborators in identifying a large unmet medical need in this important patient population, and facilitated by the differentiation of Vascepa from earlier generation triglyceride-lowering therapies, this is the first ever prospective study of this population with any therapy.

The primary endpoint of this global, double-blind study is the time to the first occurrence of a composite of primary major adverse cardiovascular events (MACE). Results will be compared between the Vascepa and placebo groups. The study was designed to accumulate 1,612 MACE at which level the study was robustly designed to have 90% power to detect a 15% relative risk reduction in MACE between the Vascepa and placebo arms of the study. The study is being conducted under a Special Protocol Assessment (SPA) agreement with the FDA.

As previously reported, Amarin estimates that the onset of approximately 1,612 MACE has occurred. In March 2018, patients in the study began to complete their final clinical site visits, a key step towards study completion.

Amarin is intentionally blinded to the results of the study and will remain blinded to such results until after the study is completed and the database is locked. Final patient visits will be followed by completing data entry for the more than 35,000 patient years of study in

REDUCE-IT, and typical database quality control measures, known as cleaning. In parallel, adjudication will be completed for all MACE which occurred during the study, including adjudication for certain events which, per protocol, cannot be finally adjudicated until patients complete their final site visit and results are available from certain non-invasive diagnostic testing conducted during such site visits. These steps will be followed by the database lock and final efficacy and safety analyses, including analysis of the trial's primary endpoint of first MACE events in the study, and the analyses of more than thirty pre-defined secondary and tertiary endpoints. Winding down a study of this magnitude to completion typically takes many months. The company believes that it is on track to achieve its objective of reporting top-line results from this important study before the end of Q3 2018.

Financial Update

Net product revenue for the three months ended March 31, 2018 and 2017 was \$43.8 million and \$34.3 million, respectively. The increase in net product revenue was primarily attributable to increases in new and recurring prescriptions of Vascepa.

During the first quarter, based on data from Symphony Health Solutions and IQVIA, Amarin experienced continued prescription growth and increase in Vascepa market share, particularly among detailed physicians. These sources reported estimated normalized total Vascepa prescriptions of approximately 381,000 and 392,000, respectively, for the three months ended March 31, 2018, representing growth of approximately 25% and 27%, respectively, over levels reported for the first three months of the prior year.

The company recognized licensing revenue of \$0.1 million and \$0.3 million in the three months ended March 31, 2018 and 2017, respectively, related to agreements for the commercialization of Vascepa outside the United States.

Cost of goods sold for the three months ended March 31, 2018 and 2017 was \$10.6 million and \$8.2 million, respectively. Gross margin on net product revenue was 76% for each of the three months ended March 31, 2018 and 2017.

Selling, general and administrative expenses in the three months ended March 31, 2018 and 2017 were \$43.4 million and \$34.2 million, respectively. This increase is due primarily to increased promotional activities, including commercial spend for anticipated expansion following successful REDUCE-IT results, and increased co-promotion fees, including an accrual for co-promotion tail payments as well as an increase in co-promotion fees calculated on increased gross margin resulting from higher net product revenue. The tail co-promotion fees, which are calculated as a percentage of the 2018 co-promotion fee, are payable in 2019 through 2021. Such tail co-promotion fees will be accrued throughout 2018.

Research and development expenses in the three months ended March 31, 2018 and 2017 were \$11.8 million and \$10.8 million, respectively. This increase in expense was primarily driven by the timing of REDUCE-IT and related costs.

Under U.S. GAAP, Amarin reported a net loss of \$24.1 million in the first quarter of 2018, or basic and diluted loss per share of \$0.08. This net loss included \$3.8 million in non-cash stock-based compensation expense. Amarin reported a net loss of \$20.9 million in the first quarter of 2017, or basic and diluted loss per share of \$0.08. This net loss included \$3.4 million in non-cash stock-based compensation expense.

Excluding non-cash gains or losses for stock-based compensation, non-GAAP adjusted net loss was \$20.3 million for the first quarter of 2018, or non-GAAP adjusted basic and diluted loss per share of \$0.07, compared to non-GAAP adjusted net loss of \$17.6 million for the first quarter of 2017, or non-GAAP adjusted basic and diluted loss per share of \$0.07.

Amarin reported cash and cash equivalents of \$129.0 million as of March 31, 2018. Excluding proceeds from the equity financing completed in the first quarter and excluding other financing-related amounts (interest and royalty) and without the company's high level of research and development payments, most of which relates to advancing the REDUCE-IT study to completion this year, net cash outflow in the quarter ended March 31, 2018 was approximately \$0.1 million. Cash outflows relating to research and development in Q1 2018 totaled approximately \$11.3 million and cash paid for interest and royalties, in aggregate, was approximately \$5.9 million.

As of March 31, 2018, the company had \$39.2 million in net accounts receivable (\$57.6 million in gross accounts receivable before allowances and reserves) and \$35.1 million in inventory.

As of March 31, 2018, Amarin had approximately 293.6 million American Depository Shares (ADSs) and ordinary shares outstanding, 32.8 million common share equivalents of Series A Convertible Preferred Shares outstanding and approximately 25.7 million equivalent shares underlying stock options at a weighted-average exercise price of \$3.35, as well as 12.4 million equivalent shares underlying restricted or deferred stock units.

Amarin's partner in the Middle East and North Africa, or MENA region, in the first quarter of 2018 obtained approval for Vascepa in Lebanon. Amarin anticipates additional approvals in the MENA region, including potential additional approvals in 2018. Amarin's

partner for China, Eddingpharm, is progressing in its clinical study of Vascepa in China. This study, which recently commenced, potentially positions Vascepa to be the first prescription grade EPA product to receive drug approval in China.

Conference call and webcast information

Amarin will host a conference call at 7:30 a.m. ET today, May 2, 2018. The call will be webcast live with slides and accessible through the investor relations section of the company's website at www.amarincorp.com. The call can also be heard via telephone by dialing 877-407-8033. A replay of the call will be made available for a period of two weeks following the conference call. To hear a replay of the call, dial 877-481-4010 (inside the United States) or 919-882-2331 (outside the United States). A replay of the call will also be available through the company's website shortly after the call. For both dial-in numbers please use conference ID 27922.

Use of non-GAAP adjusted financial information

Included in this press release are non-GAAP adjusted financial information as defined by U.S. Securities and Exchange Commission Regulation G. The GAAP financial measure most directly comparable to each non-GAAP adjusted financial measure used or discussed, and a reconciliation of the differences between each non-GAAP adjusted financial measure and the comparable GAAP financial measure, is included in this press release after the condensed consolidated financial statements.

Non-GAAP adjusted net loss was derived by taking GAAP net loss and adjusting it for non-cash stock-based compensation expense. Management uses these non-GAAP adjusted financial measures for internal reporting and forecasting purposes, when publicly providing its business outlook, to evaluate the company's performance and to evaluate and compensate the company's executives. The company has provided these non-GAAP financial measures in addition to GAAP financial results because it believes that these non-GAAP adjusted financial measures provide investors with a better understanding of the company's historical results from its core business operations.

While management believes that these non-GAAP adjusted financial measures provide useful supplemental information to investors regarding the underlying performance of the company's business operations, investors are reminded to consider these non-GAAP measures in addition to, and not as a substitute for, financial performance measures prepared in accordance with GAAP. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with the company's results of operations as determined in accordance with GAAP. In addition, it should be noted that these non-GAAP financial measures may be different from non-GAAP measures used by other companies, and management may utilize other measures to illustrate performance in the future.

About Amarin

Amarin Corporation plc is a biopharmaceutical company focused on the commercialization and development of therapeutics to improve cardiovascular health. Amarin's product development program leverages its extensive experience in lipid science and the potential therapeutic benefits of polyunsaturated fatty acids. Vascepa® (icosapent ethyl), Amarin's first FDA-approved product, is a highly-pure, omega-3 fatty acid product available by prescription. For more information about Vascepa visit www.vascepa.com. For more information about Amarin visit www.amarincorp.com.

About REDUCE-IT

Amarin's clinical development program for Vascepa includes a trial known as the REDUCE-IT cardiovascular outcomes study, an 8,175-patient study commenced in 2011. REDUCE-IT is the first multinational cardiovascular outcomes study evaluating the effect of prescription pure EPA therapy, or any triglyceride-lowering therapy, as an add-on to statins in patients with high cardiovascular risk who, despite stable statin therapy, have elevated triglyceride levels (150-499 mg/dL). A large portion of the male and female patients enrolled in this outcomes study are anticipated to also be diagnosed with type 2 diabetes. As reported previously, Amarin expects to announce top-line results of this important study before the end of Q3 2018. The REDUCE-IT trial is being conducted under a Special Protocol Assessment agreement with the U.S. Food and Drug Administration.

Additional information on clinical studies of Vascepa can be found at www.clinicaltrials.gov.

About VASCEPA® (icosapent ethyl) capsules

Vascepa® (icosapent ethyl) capsules are a single-molecule prescription product consisting of the omega-3 acid commonly known as EPA in ethyl-ester form. Vascepa is not fish oil, but is derived from fish through a stringent and complex FDA-regulated manufacturing process designed to effectively eliminate impurities and isolate and protect the single molecule active ingredient. Vascepa, known in scientific literature as AMR101, has been designated a new chemical entity by the FDA. Amarin has been issued multiple patents internationally based on the unique clinical profile of Vascepa, including the drug's ability to lower triglyceride levels in relevant patient populations without raising LDL-cholesterol levels.

FDA-approved indication and usage

- Vascepa (icosapent ethyl) is indicated as an adjunct to diet to reduce triglyceride (TG) levels in adult patients with severe (≥ 500 mg/dL) hypertriglyceridemia.
- The effect of Vascepa on the risk for pancreatitis and cardiovascular mortality and morbidity in patients with severe hypertriglyceridemia has not been determined.

Important safety information for Vascepa

- Vascepa is contraindicated in patients with known hypersensitivity (e.g., anaphylactic reaction) to Vascepa or any of its components.
- Use with caution in patients with known hypersensitivity to fish and/or shellfish.
- The most common reported adverse reaction (incidence $> 2\%$ and greater than placebo) was arthralgia (2.3% for Vascepa, 1.0% for placebo). There was no reported adverse reaction $> 3\%$ and greater than placebo.
- Patients receiving treatment with Vascepa and other drugs affecting coagulation (e.g., anti-platelet agents) should be monitored periodically.
- In patients with hepatic impairment, monitor ALT and AST levels periodically during therapy.
- Patients should be advised to swallow Vascepa capsules whole; not to break open, crush, dissolve, or chew Vascepa.
- Adverse events and product complaints may be reported by calling 1-855-VASCEPA or the FDA at 1-800-FDA-1088.

FULL VASCEPA PRESCRIBING INFORMATION CAN BE FOUND AT WWW.VASCEPA.COM.

Vascepa has been approved for use by the United States Food and Drug Administration (FDA) as an adjunct to diet to reduce triglyceride levels in adult patients with severe (≥ 500 mg/dL) hypertriglyceridemia. Nothing in this press release should be construed as promoting the use of Vascepa in any indication that has not been approved by the FDA.

About cardiovascular disease

Worldwide, cardiovascular disease (CVD) remains the #1 killer of men and women. In the United States, CVD leads to one in every three deaths – one death approximately every 38 seconds – with annual treatment cost in excess of \$500 billion.^{1, 2}

Beyond the cardiovascular risk associated with LDL-C, genetic, epidemiologic, clinical and real-world data suggest that patients with elevated triglycerides (TG) (fats in the blood), and TG-rich lipoproteins, are at increased risk for cardiovascular disease.^{3, 4, 5, 6}

Leading clinical investigations seeking to address cardiovascular risk reduction beyond lowering LDL-C focus on interrupting the atherosclerotic process (e.g., plaque formation and instability) by beneficially affecting other lipid, lipoprotein and inflammation biomarkers and cellular functions thought to be related to atherosclerosis and cardiovascular events.

Forward-looking statements

This press release contains forward-looking statements, including expectations regarding adjudication of MACE events, results and related timing and announcements with respect to Amarin's REDUCE-IT cardiovascular outcomes study; expectations related to the final outcomes of the REDUCE-IT study and the anticipated successful completion of the REDUCE-IT study; and statements regarding the potential and therapeutic benefits of Vascepa. These forward-looking statements are not promises or guarantees and involve substantial risks and uncertainties. In particular, as disclosed in filings with the U.S. Securities and Exchange Commission, Amarin's ability to effectively develop and commercialize Vascepa will depend in part on its ability to continue to effectively finance its business, efforts of third parties, its ability to create market demand for Vascepa through education, marketing and sales activities, to achieve increased market acceptance of Vascepa, to receive adequate levels of reimbursement from third-party payers, to develop and maintain a consistent source of commercial supply at a competitive price, to comply with legal and regulatory requirements in connection with the sale and promotion of Vascepa and to maintain patent protection for Vascepa. Among the factors that could cause actual results to differ materially from those described or projected herein include the following: uncertainties associated generally with research and development, clinical trials and related regulatory approvals; the risk that historical REDUCE-IT event rates may not be predictive of future results and related cost may increase beyond expectations; the risk that regulatory reviews may impact the current design of the REDUCE-IT study or cause a change in strategic direction with respect to continuation of the study; the risk that future legal determinations and interactions with regulatory authorities may impact Vascepa marketing and sales rights and efforts; the risk that Vascepa may not show clinically meaningful effects in REDUCE-IT or support regulatory approvals for cardiovascular risk reduction;

and the risk that patents may not be upheld in anticipated patent litigation. A further list and description of these risks, uncertainties and other risks associated with an investment in Amarin can be found in Amarin's filings with the U.S. Securities and Exchange Commission, including its most recent Quarterly Report on Form 10-Q. Existing and prospective investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Amarin undertakes no obligation to update or revise the information contained in this press release, whether as a result of new information, future events or circumstances or otherwise.

Availability of other information about Amarin

Investors and others should note that Amarin communicates with its investors and the public using the company website (www.amarincorp.com), the investor relations website (investor.amarincorp.com), including but not limited to investor presentations and investor FAQs, Securities and Exchange Commission filings, press releases, public conference calls and webcasts. The information that Amarin posts on these channels and websites could be deemed to be material information. As a result, Amarin encourages investors, the media, and others interested in Amarin to review the information that is posted on these channels, including the investor relations website, on a regular basis. This list of channels may be updated from time to time on Amarin's investor relations website and may include social media channels. The contents of Amarin's website or these channels, or any other website that may be accessed from its website or these channels, shall not be deemed incorporated by reference in any filing under the Securities Act of 1933.
