AMARIN CORPORATION AND ACADIA PHARMACEUTICALS SIGN PHARMACEUTICAL DEVELOPMENT AGREEMENT

London, United Kingdom, 18th June 2003 - Amarin Corporation plc (NASDAQ: AMRN) today confirmed that its Swedish subsidiary, Amarin Development AB, has been engaged to provide pharmaceutical formulation and manufacturing services for ACADIA Pharmaceuticals, based in San Diego, California and Copenhagen, Denmark. The deal centers on the continued development of ACADIA's small molecule drug candidate ACP-103, currently in Phase I clinical studies. ACADIA intends to utilize Amarin's services in connection with additional clinical studies planned for ACP-103 for the treatment of neuropsychiatric and neurological disorders.

Rick Stewart, CEO of Amarin, commented on the successful deal, "The selection of Amarin Development by ACADIA to provide these services underscores our strengthened position as a global product development company. This agreement additionally makes use of Amarin's expertise in neurology and complements the research and development activities of Amarin Pharmaceuticals Inc. in the US, making this a particularly attractive signing."

About ACP-103

ACP-103 is initially being pursued as a therapy for treatment-induced dysfunctions in Parkinson's disease, an indication that lacks adequate drug therapy. Due to its unique profile, ACP-103 may also have broad utility in a range of other important indications. ACP-103 is a proprietary small molecule that acts as a selective inverse agonist at the 5-HT_{2A} receptor.

About Amarin

Amarin Corporation plc is a specialty pharmaceutical company focused on neurology and pain management. Amarin has multiple pharmaceutical products on the US market along with a development pipeline that includes two late-stage candidates: Zelapar (selegiline HCl orally disintegrating tablets) for Parkinson's disease and LAX-101, a proprietary compound for Huntington's Disease. For press releases and other Company information, visit our websites at <http://www.amarincorp.com> and <http://www.amarinpharma.com>.

About ACADIA

ACADIA Pharmaceuticals is a drug discovery and development company that efficiently discovers novel small molecule drug candidates using its proprietary chemical-genomics platform. ACADIA has applied its platform to generate a broad discovery pipeline directed at large unmet medical needs including Parkinson's disease, chronic pain, psychosis, and glaucoma. Two of ACADIA's drug candidates have been successfully advanced from initial discovery to clinical development, and several additional programs are in late-stage preclinical testing. ACADIA's corporate headquarters as well as its biological research facilities are located in San Diego, California and its chemistry research facilities are located in Copenhagen, Denmark.

Statements in this press release that are not historical facts are forward-looking statements that involve risks and uncertainties which may cause the Company's actual results in future periods to be materially different from any performance suggested herein. Such risks and uncertainties include, without limitation, risks associated with the inherent uncertainty of pharmaceutical research, product development and commercialization, the impact of competitive products and patents, as well as other risks and uncertainties detailed from time to time in periodic report, including but not limited to the filing or approval of the NDA for Zelapar. For more information, please refer to Amarin Corporation's Annual Report for 2002 on Form 20-F and its Form 6-Ks as filed with the U.S. Securities and Exchange Commission. The Company assumes no obligation to update information on its expectations.
